

Traditional Masonry Units

Delivered in nominal 4" bed depth, Adair® Limestone Masonry Units can be installed using traditional unit masonry detailing and construction techniques, resulting in installation efficiencies.

The smooth finishes of Adair® Limestone Masonry Units enhance the natural limestone patterns. The uniform sizes provided with this finish are ideal for coursed ashlar installation. Production efficiencies of this finish make it available at affordable prices, offering traditional limestone at non-traditional prices.

For random ashlar applications, "Adair® Ashlar" is available in rocked and split face textures. Rocked and split face finishes are supplied at random lengths (standard: up to 30" 750mm, custom: up to 48" or 1200mm). These varying lengths facilitate the installation of a random ashlar pattern. Ends are a combination of split and sawn finishes.

Anchored Dimension Stone

Anchored dimension stone command attention and are well suited for accents or projects of all sizes. Different size options, along with various cutting and shaping possibilities provide infinite creative options for the designer.

Innovative use of Adair® Limestone is evident in many contemporary and classic styles in prominent structures across North America. Adair® Limestone possesses an intrinsic beauty and provides a sense of grandeur to any design.

Tiles

Natural Adair® Limestone is beauty unparalleled and often used for flooring, patio or stair tread applications.

The inherent warmth and strength of Adair® Limestone provides elegance, strength and sophistication in many commercial and institutional settings.

Landscaping

Adair® Limestone is durable and ideal for paving and landscape applications.

Availability in various sizes enables flooring and patio designs not offered in alternate manufacturing stones.

Adair® Limestone is recommended for all at grade applications due to strong salt resistant properties.

Adair®

Limestone

Create without limits.

Adair® Limestone is a quarried stone of exceptional versatility, value and beauty.

Extensive fabrication possibilities invite distinctive, innovative and affordable designs.

From large dimension stone slabs to standard pre-cut smaller units, the designer is challenged to create without limitations.

Adair® Limestone is a high quality, low absorption dolomitic limestone with extremely high strength and durability.

Be it universities, hospitals, embassies, custom residences, contemporary or classic in design, this strong and exceptional stone encourages strong, exceptional creations.

Arriscraft offers manufacturing, technical and industry leadership with over 45 years of quarry operation experience and capacity exceeding 30,000 metric tons of quarry blocks.

Important Notes

Colors and textures have been reproduced as closely as the printing process allows. Final selection should be made from actual samples. Adair® Limestone must be installed using industry recommended materials and techniques and conform to all related building code requirements. All masonry products are intended for above-grade installations. Proper care, installation and cleaning are required for warranty validation. Please visit www.arriscraft.com, and refer to Arriscraft-DATA 04435 - Adair® Limestone for complete details, and Arriscraft-CARE for Storage and Handling recommendations.
